

MindSphere V3.0 Tutorial:

How to add new CF users to an ORG via CF CLI

Author: Karen Tamrazyan

Date: 17 March 2018

Version: 1.1

Actions in GREEN box should be performed by user

Actions in RED box should be performed by admin

1. Install Cloud Foundry Command Line Interface (CF CLI) software from <https://github.com/cloudfoundry/cli>

2. Open command-shell (on Windows: Start / Execute / cmd)

3. If you are behind a corporate firewall, then set up proxies by entering these two lines (this step is optional):

```
set http_proxy=http://coia.hcvpc.io:9400
set https_proxy=http://coia.hcvpc.io:9400
```

4. Enter the following command:

```
cf login -a https://api.cf.eu1.mindsphere.io -sso
```

5. Visit <https://login.cf.eu1.mindsphere.io/passcode> to get an *One Time Code*

6. Login using the **WebKey** Link below the *Cloud Foundry Login Form*

7. Type in your MindSphere Credentials

8. Copy the *One Time Code* and use in the CF CLI

9. Admin should perform:

```
cf set-org-role EMAIL ORG OrgManager
```

where EMAIL is user's email address and ORG is an org's name. Instead of „OrgManager“ [other roles](#) can be assigned.
